12 Top 12 ways Schneider Electric™ impacts a hotel's financial performance

1 Eliminating waste:
A detailed energy audit of your building will identify areas of waste. A 20 per cent reduction in energy waste can increase profit up to 10 per cent.

2 Reduction of capital and operating costs:
Our solutions reduce up-front costs (simplify procurement; reduce number of vendors) as well as on-going costs (building integration) throughout the life cycle of your building.

3 Quick payback:
Often realize ROI on your project in one to three years.

4 System integration:
Integrating all hotel systems simplifies management and makes you more productive, giving you more time to focus on other important areas that affect income.

5 Minimal interruption:
With our hotel expertise, implementing our solutions will not interrupt your daily operations.

6 Measurement and monitoring:
With the tools to continuously measure and monitor energy use, you will realize savings over the long term, even as energy costs continue to rise.

7 Energy remote monitoring:
Monitor your energy use from anywhere with an Internet connection to help ensure you receive all the savings possible.

8 Improving guest satisfaction:
Our guest room control solutions enhance the guest experience by providing comfort, convenience, and simplicity.

9 Continuous power supply:
We ensure a continuous power supply to keep your critical systems up and running without interruption, so you don't lose money.

10 Strategic partnering:
Our hotel specialists and Certified Energy Architects provide advanced project management to make sure your project is completed on time and on budget.

11 Simplicity:
Our solutions are comprehensive yet simple to use. Guests experience advanced technology and convenient end-to-end connectivity solutions, which entice them to come back.

12 Education:
We offer classes through our free Energy University™, giving you the opportunity to learn more energy-related ways you can increase profit.
